

The Biosphere

P. 12

- The Earth system that contains ALL Living things.

Where is the Biosphere?

① Are there distinct boundaries for the biosphere? Explain.

② List something that would be found in both the biosphere and...

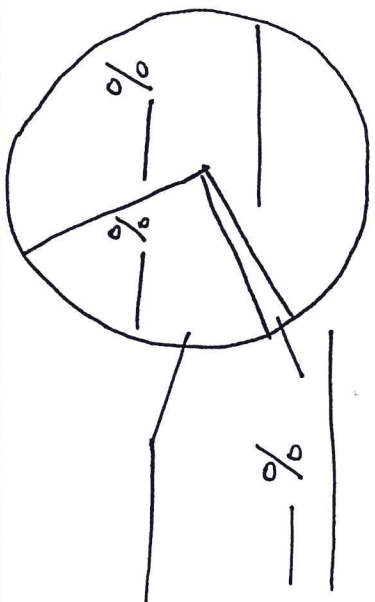

- ... hydrosphere _____
- ... geosphere _____
- ... atmosphere _____
- ... cryosphere _____

The Atmosphere

P. 13-14

- A _____ of gases that form a layer around Earth.

What Makes Up The Atmosphere?

Layers of The Atmosphere

Ans

Geosphere

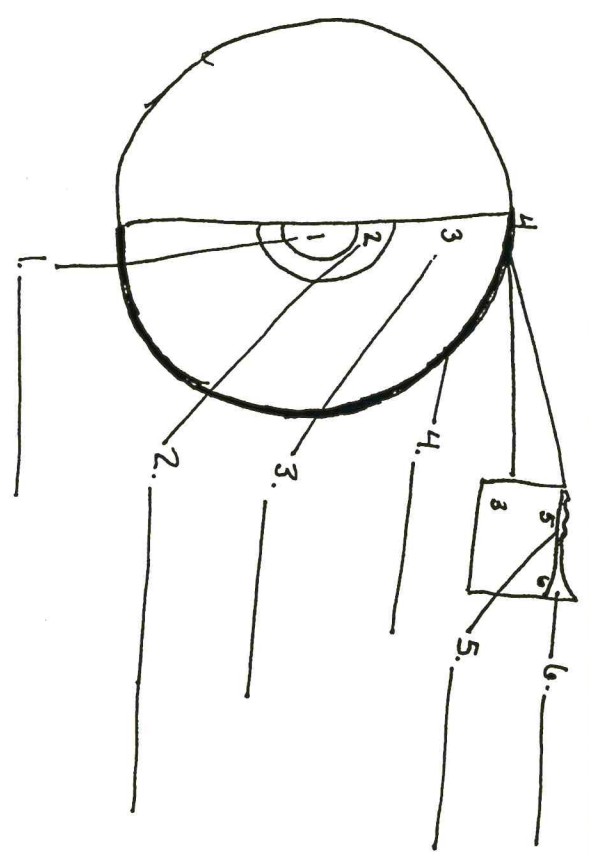

P.17-19

- The SOLID part of Earth

Materials In The Geosphere

① _____	② _____	③ _____
Minerals		Rocks
① Naturally occurring (NBT man-made)		① Naturally occurring (NBT man-made)
② Inorganic		② S _____
③ solid		③ Composed of minerals/organic matter
④ _____		
⑤ _____		

Earth's structure

Ans

Oceansphere

P15-16

- A system that contains ALL of Earth's water.

OCEANS

- _____ % of Earth's water is in the ocean.

- Dissolved _____ make the water salty.

FRESH WATER

- _____ % of freshwater is accessible on Earth's surface.

- Lakes and rivers are _____, that hold water supplied from rain and snow.

- GROUNDWATER - water stored in the _____ and _____ beneath Earth's surface.
